A

Abrasion	10-3
Accelerating System	2-13
Accessory Section.....	1-38
accessory case.....	1-38
gear train.....	1-38
Accessory Zone Cooling.....	6-39
Adjusting Idle Mixtures	2-29
Aerodynamic Factors	7-4
Aerodynamic twisting force.....	7-9
Aeromax Aviation 100 (IFB) Aircraft Engine.....	11-11
Afterburning/Thrust Augmentation	3-27
Afterfiring	10-31
Airblast Nozzles.....	2-45
air bleed.....	2-11
Air Entrance	1-37
air filter.....	3-1
Airflow Controls	6-10
Airflow Section.....	2-21
airframe fuel system.....	2-2
Air Oil Coolers.....	6-27
Air pressure against the propeller piston	7-9
air scoop.....	3-1
air throttle assembly.....	2-26
Air Turbine Starters	
air path.....	5-14
axial flow turbine.....	5-12
control assembly.....	5-15
drive coupling.....	5-12
output shaft assembly	5-12
pressure-regulating and shutoff valve	5-14
ring gear housing.....	5-13
rotor switch actuator.....	5-12
sprag clutch assembly.....	5-12
transmission housing	5-13
turbine housing.....	5-13
Air Turbine Starter Troubleshooting Guide.....	5-16
Aluminium Propeller Inspection.....	7-21
Aluminum Wire Terminals	4-63
Ambient Conditions	10-58
American wire gauge (AWG)	4-48
Analyzer Safety Precautions	10-61
Anti-Icing Systems.....	7-17
APU Fire Detection and Extinguishing System.....	9-17
APU Fire Warning.....	9-18
Fire Bottle Discharge.....	9-18
Area of a Circle.....	1-28

Atmospheric air.....	1-1
augmentors.....	3-22
Augmentors.....	6-33
Authorized Personnel That Meet FAA Regulations	11-3
Autofeathering System.....	7-20
Automatic Mixture Control (AMC).....	2-18
Auxiliary Ignition Starting Units	4-17

B

Backfiring	10-30
baffles.....	6-33
Balancing Procedure	7-26
ball bearings	1-53
Ball Bearings.....	1-22
Basic Engine Operating Principles	10-29
Basic Fuel System.....	2-2
Bearings	1-22
Bellmouth Compressor Inlets	3-19
Bendix/Precision Fuel-Injection System.....	2-21
Bend Radii	4-55
Bernoulli's principle	1-58
blade angle	7-2, 7-5
Blade Tracking.....	7-22
Boeing 777 Aircraft Fire Detection and Extinguishing System.....	9-13
Boeing 777 Fire Extinguisher System.....	9-14
Fire Extinguisher Containers	9-14
Continuous Fault Monitoring	9-13
Engine Fire Operation	9-17
Engine Fire Switches.....	9-16
Fire Detection	9-13
Nacelle Temperature Recording.....	9-13
Overheat Detection.....	9-13
Single/Dual Loop Operation	9-14
Squib.....	9-16
System Test	9-14
Bonding.....	4-65
Brake Horsepower	1-31
Brayton cycle	1-58
Breaker Point Inspection.....	4-39
Breather Pressurizing System	6-29
Breather Subsystems.....	6-30
Brinelling	10-3
brush block.....	7-18
Built-In Engine Timing Reference Marks	4-26
Burning	10-3
Burnishing.....	10-3

C

Cam Rings.....	1-18	Checking the Friction Torque in Free Rotation	11-21
Capacitance	4-8	Checking the Internal Timing of a Magneto.....	4-29
Capacitor Discharge Exciter Unit	4-44	Checking the Propeller Gearbox.....	11-21
Carbon Fouling of Spark Plugs.....	4-33	Checks and Adjustments After Engine Runup and Operation.....	8-13
carbon seal	1-53	Chipping.....	10-3
Carburetion Principles	2-5	Circuit Protection Devices	4-70
Application of Venturi Principle to Carburetor.....	2-5	Cleaning	10-5
Venturi Principles.....	2-5	Cleaning Propeller Blades.....	7-27
Carburetor Adjustment and Checks	11-24	Cleaning the Oil Tank.....	11-20
carburetor air filter	3-1	Clearances	10-52
Carburetor Air Temperature (CAT) Indicator	10-21	Cloud Point	6-3
carburetor fuel strainer.....	2-16	Cold Cylinder Check.....	10-43
Carburetor Icing	2-8	Combination Splash and Pressure Lubrication	6-4
Fuel evaporation ice	2-8	Combustion Drain Valves.....	2-46
Impact ice	2-9	Combustion Process.....	10-29
Throttle ice	2-9	Combustion Section	1-43
Carburetor Induction System	3-1	Combustion Section Inspection	10-47
Induction System Filtering	3-4	Compactness	1-3
Induction System Icing.....	3-3	Complete fuel system.....	2-31
Induction System Inspection and Maintenance.....	3-4	Components	9-1
Induction System Troubleshooting	3-5	Composite Propeller Inspection.....	7-21
Carburetor Removal.....	2-27	Compression	10-31
Carburetor Synchronization	11-17	Compression Ratio.....	1-29
Carburetor Systems.....	2-7	Compressor Inlet Screens	3-18
accelerating system.....	2-7	compressors.....	1-38
idle cutoff system	2-7	Axial-Flow Compressor	1-40
idling system	2-7	rotor.....	1-41
main metering system.....	2-7	disk-type rotor	1-41
mixture control system	2-7	drum-type rotor.....	1-41
power enrichment system.....	2-8	stator	1-40
Carburetor Types	2-8	Centrifugal-Flow Compressors	1-38
float-type carburetor.....	2-8	compressor manifold	1-38, 1-39
pressure-type carburetor	2-8	diffuser.....	1-38, 1-39
Centrifugal force	7-3	impeller	1-38
Centrifugal twisting force	7-3, 7-9	Compressor Section	1-38
Centrifugal twisting moment	7-8	Conductor Insulation.....	4-52
Chafing.....	10-3	Dielectric strength	4-52
Changing Oil.....	6-17	Insulation resistance	4-52
Assembly of and Installation of Oil Filters	6-18	Conduit.....	4-69
Draining Oil.....	6-17	Connecting Rods.....	1-9, 10-5
Oil and Filter Change and Screen Cleaning	6-17	Connecting Terminal Lugs to Terminal Blocks.....	4-64
Oil Filter Removal Canister Type Housing.....	6-17	Connector Identification	4-68
Oil Filter/Screen Content Inspection.....	6-17	Connectors	4-67
Troubleshooting Oil Systems	6-18	Constant-Speed Feathering Propeller	7-15
Charging the Propeller Air Dome	7-27	Constant-Speed Propellers	7-14
Checking Alignment	10-9	constant speed unit (CSU)	7-32
Checking and Adjusting Propeller Blade Angles	7-23	Containers	9-8
Checking Ignition Induction Vibrator Systems	4-33	Continental/TCM Fuel-Injection System.....	2-25
Checking Takeoff Thrust	10-57	Continuity Check of Aircraft EGT Circuit	10-63
Checking the Carburetor Actuation	11-19	Continuous ignition.....	4-43

Continuous-Loop Detector Systems	9-3	DC Generator Maintenance.....	4-13
Automatic Self-Interrogation	9-6	Generator Ratings.....	4-13
Combination Fire and Overheat Warning	9-5	Parallel (Shunt) Wound DC Generators.....	4-12
Dual-Loop Systems	9-6	Series Wound DC Generators	4-12
Fault Indication.....	9-6	Decarbonizing	10-5
Fenwall Continuous-Loop System	9-3	decarbonizing solution.....	10-6
Fire Detection Control Unit (Fire Detection Card)	9-6	Degreasing	10-5
Kidde Continuous-Loop System	9-4	deice boot	7-19
Sensing Element	9-5	Deicing Systems.....	7-18
Support Tube-Mounted Sensing Elements.....	9-6	Density altitude	3-6
System Test	9-5	Dent.....	10-3
Temperature Trend Indication.....	9-5	Deoiler.....	6-28
Controlling or Monitoring the Electrical Load	4-70	Detonation.....	10-29
Convergent-Divergent Exhaust Nozzle	3-26	Dielectric Inspection	4-41
Convergent Exhaust Nozzle.....	3-26	differential pressure controller.....	3-13
Cooling System.....	11-6	Differential Pressure Tester	10-39
Cooling System of Rotax 447 UL SCDI.....	11-4	Diffuser	1-43
Cooling System of the Rotax 582 UL DCDI.....	11-4	Dimensional Inspection	10-7
Copper Wire Terminals.....	4-62	Direct Cranking Electric Starter.....	5-2
Corrosion.....	10-3	Direct Cranking Electric Starting System for Large	
cowl flaps	6-33	Reciprocating Engines.....	5-3
Cowling.....	6-33	motor assembly	5-3
Crack	10-3	starter motor.....	5-3
Crankshaft.....	10-5, 10-9	Direct Cranking Electric Starting System for Small	
Crankshaft Balance	1-8	Aircraft	5-6
Crankshafts	1-7	Direct Drive VW Engines.....	11-12
Crimping Tools	4-62	Disassembly	10-2
Cut.....	10-3	Discharge Indicators	9-9
Cutting Wire and Cable	4-60	discharge nozzle.....	2-6
Cycling timers.....	7-19	Discharge Valves	9-8
Cylinder Removal	10-41	Disconnection of Engine Controls	8-7
Cylinder Assembly Reconditioning.....	10-11	Disconnection of Lines	8-8
Cylinder Baffle and Deflector System Inspection	6-37	Divided-Entrance Duct	3-17
Cylinder Barrel.....	10-7	dome assembly.....	7-35
Cylinder Barrels	1-15	Draining the Engine	8-6
cylinder bases.....	6-34	Dry Sump Lubrication System Operation.....	6-11
Cylinder Compression Tests	10-39	Dry Sump Oil Systems.....	6-4
Cylinder Grinding and Honing	10-17	Duplex Fuel Nozzle	2-44
Cylinder Head	10-4	Durability	1-2
Cylinder Heads.....	1-14	Dye Penetrant Inspection	10-6
Cylinder Head Temperature Indicator	10-23	Dynamic Balancing.....	7-26
Cylinder Installation.....	10-42	Dynamic Dampers	1-8
Cylinder Numbering	1-15		
Cylinder Replacement.....	10-41	E	
Cylinders.....	1-14	Economizer System	2-13
Cylinder Temperature Indicating Systems.....	6-37	Eddy Current Inspection	10-7
D		EEC system.....	2-36
Daily Maintenance Checks	11-21	Efficiencies	1-33
DC Generators	4-12	E-gap	4-29
Compound Wound DC Generators	4-13	EGT Circuit Error	10-65
		Electrical Disconnects.....	8-6

Electrical Equipment Installation.....	4-70	insulation blanket	1-52
Electrical Load Limits.....	4-70	tailpipe	1-52
Electrical Wiring Installation.....	4-54	Exhaust System.....	11-24
Electric Starting Systems and Starter Generator Starting System.....	5-10	Exhaust System Inspection	3-22
Electric System	11-5, 11-8	Exhaust System Repairs.....	3-24
Electronic Control Unit (ECU)	4-14, 4-15	Exhaust Systems With Turbocharger.....	3-24
Emergency Splicing Repairs.....	4-63	F	
Engine and Engine Compartment Inspection	11-23	Factors Affecting Engine Operation	10-31
Engine Checks	10-57	Factors Affecting Selection of Conductor Material	4-50
Engine Cooling Systems	6-32	Factors Affecting the Selection of Wire Size	4-48
Engine Cowling	6-36	FADEC for an Auxiliary Power Unit	2-36
Engine Fire Detection Systems.....	9-2	FADEC Fuel Control Propulsion Engine	2-37
Engine Fire Extinguishing System.....	9-7	FADEC Fuel Control Systems.....	2-36
Engine Fuel System Components	2-41	FADEC System Description.....	4-14
Engine General Requirements	11-1	Failure To Feather or Feathers Slowly.....	7-30
Engine Inspection Charts	11-25	Feathering	7-16
Engine Instruments	10-20, 10-24	Feathering Operation	7-37
Engine Mounts.....	8-16	Fire Detection System Maintenance	9-10
Mounts for Reciprocating Engines.....	8-16	Fire Detection System Troubleshooting	9-12
Mounts for Turbofan Engines	8-17	Fire Extinguisher System Maintenance Practices.....	9-12
Turbine Vibration Isolation Engine Mounts	8-17	Fire Extinguishing Agents	9-7
Engine Noise Suppression	3-29	Fire Switch.....	9-9
Engine Oil Pressure Indicator	10-55	Fire Zones	9-7
Engine Oil Temperature Indicator	10-55	Firing Order	1-16
Engine Operational Problems	8-2	Fittings	2-32
Engine or Component Lifespan Exceeded.....	8-1	Fixed-Pitch Wooden Propellers	7-12
Engine Preservation	11-23	Flaking	10-3
Engine Preservation and Return to Service	8-19	Flash Point and Fire Point.....	6-3
Engine Pressure Ratio Indicator.....	10-54	Float Chamber Mechanism System	2-10
Engines.....	1-3	Float-Type Carburetors.....	2-9
Inline Engines.....	1-3	Flow Divider.....	2-23, 2-45
Opposed engines.....	1-4	Fork-and-Blade Rod Assembly.....	1-11
O-Type Engines.....	1-4	Fretting.....	10-3
Radial Engines.....	1-4	Friction.....	6-1
V-Type Engines.....	1-4	Rolling friction	6-1
Engine Shipping Containers	8-21	wiping friction.....	6-1
Engine Shutdown.....	10-58	Friction and Brake Mean Effective Pressures.....	1-32
Engine Speed Varies With Flight Attitude (Airspeed) 7-30		Friction Horsepower	1-32
Engine Starting.....	10-25	Fuel/Air Control Unit.....	2-25
Engine Stopping.....	10-28	Fuel/Air Mixtures.....	2-3
Engine Thermocouples Out of Calibration.....	10-64	Fuel Control Assembly	2-26
Engine Troubleshooting.....	10-35	Fuel Control Maintenance.....	2-40
Engine Warm-up.....	10-25	Fuel Control Unit	2-17
Erosion	10-3	idle needle valve.....	2-17
Exhaust Gas Temperature Indicator (EGT)	10-55	manual mixture control	2-17
exhaust leak.....	3-23	power enrichment valve	2-18
Exhaust Manifold and Stack Failures	3-24	regulator fill valve	2-18
Exhaust Section.....	1-51, 10-54	fuel control unit (FCU)	7-33
Exhaust cone.....	1-51	fuel counter	2-46
exhaust nozzle	1-52	Fuel Discharge Nozzle.....	2-27

Fuel Discharge Nozzles	2-24	Governor Mechanism.....	7-9
Fuel Economy	1-2	Governor System Operation	7-11
Fuel Filters	2-42	Graphite Fouling of Spark Plugs.....	4-35
Fuel Flow Meter.....	10-22	Great Plains Aircraft Volkswagen (VW)Conversions	11-14
Fuel Heater.....	2-42	Grooving	10-3
Fuel-Injection Pump.....	2-25	Ground Check	10-26
Fuel-Injection Systems.....	2-21	Grounding	4-65
Fuel Injector	2-21	Ground Operation Engine Fire.....	10-57
